

TURN ON-HOLD TIME INTO PRODUCTION- A PLUG-AND-PLAY SOLUTION

rev. 1/15 - valid thru 12/15

No one wants to put their callers on hold, but it is an inevitable part of business. However, you can take advantage of this time with an on-hold audio system. No software is required, and the player is capable of storing nearly an hour of high quality audio.

The controls are as easy to use as a standard home stereo, and with two different players available, you can be sure that one of them will work for you.

Your complete Message On Hold System includes the digital player plus 10 messages for only \$650.

For more information you can call VisionTrust Communications and speak with one of our audio engineers. They can also help you determine which model is right for you. (Prior to calling, please try to determine if your phone system is a PBX or Key Phone System.)

We have scripts for **Invisalign, Damon, SureSmile** and for **Orthodontics** in general. Please specify which scripts you are interested in when we contact you.
